

NORTHERN UTAH INTERAGENCY FIRE CENTER

INITIAL ATTACK RUN CARDS 2016

Northern Utah Interagency Run Cards, 2016

Effective June 1 through October 31.

Notifications will occur at any time of year.

The Interagency Run Cards are developed by a group of interagency representatives to provide guidance to the Northern Utah Interagency Fire Center for initial attack dispatching of wildland fire suppression resources within a pre-identified geographic areas (run card zones).

The run cards are used when a wildfire is reported and doesn't meet the discretionary smoke report criteria. **When a NWCG qualified Incident Commander is on scene of the fire, they may adjust the pre-established initial attack response as identified on the run card** by cancelling resources currently en-route (or about to be dispatched) or ordering additional resources.

Discretionary Smoke Reports:

If any of the following smoke reports are received, the appropriate Duty Officer will need to be contacted to determine the response.

- Federal Aviation Administration (FAA) Report
- Abandoned Campfires, when clearly stated that it is still within the ring
- Incidents that local and/or volunteer fire departments have responded to, or are on scene and are requesting no additional resources
- During periods of large/multiple fire activity, when there are not enough resources to fill the run cards, the Duty Officers from FF&SL, USFS and BLM will be available to NUIFC to assist in initial attack incident prioritization.
- Duty Officers may make an adjustment to the Run Card after gathering Situational Awareness/Inelegance from the current responding resources. This should be a rare augmentation to the pre-established Run Card response.

After Hours Dispatch Procedures:

BLM: After resource duty hours, dispatchers will contact the BLM Duty Officer who will determine the level of response for BLM fires. Dispatchers are still responsible for making all notifications per the run card.

STATE: After resource duty hours, dispatchers will notify the State Area FMO and/or Duty Officers who will then determine the level of response for state and private fires. If unable to make contact with the Area FMO / Duty Officer, contact the State Duty Officer (Matt Snider 801-875-1096 or Shane Freeman 801-560-1072). Dispatchers are still responsible for making all notifications per the run card.

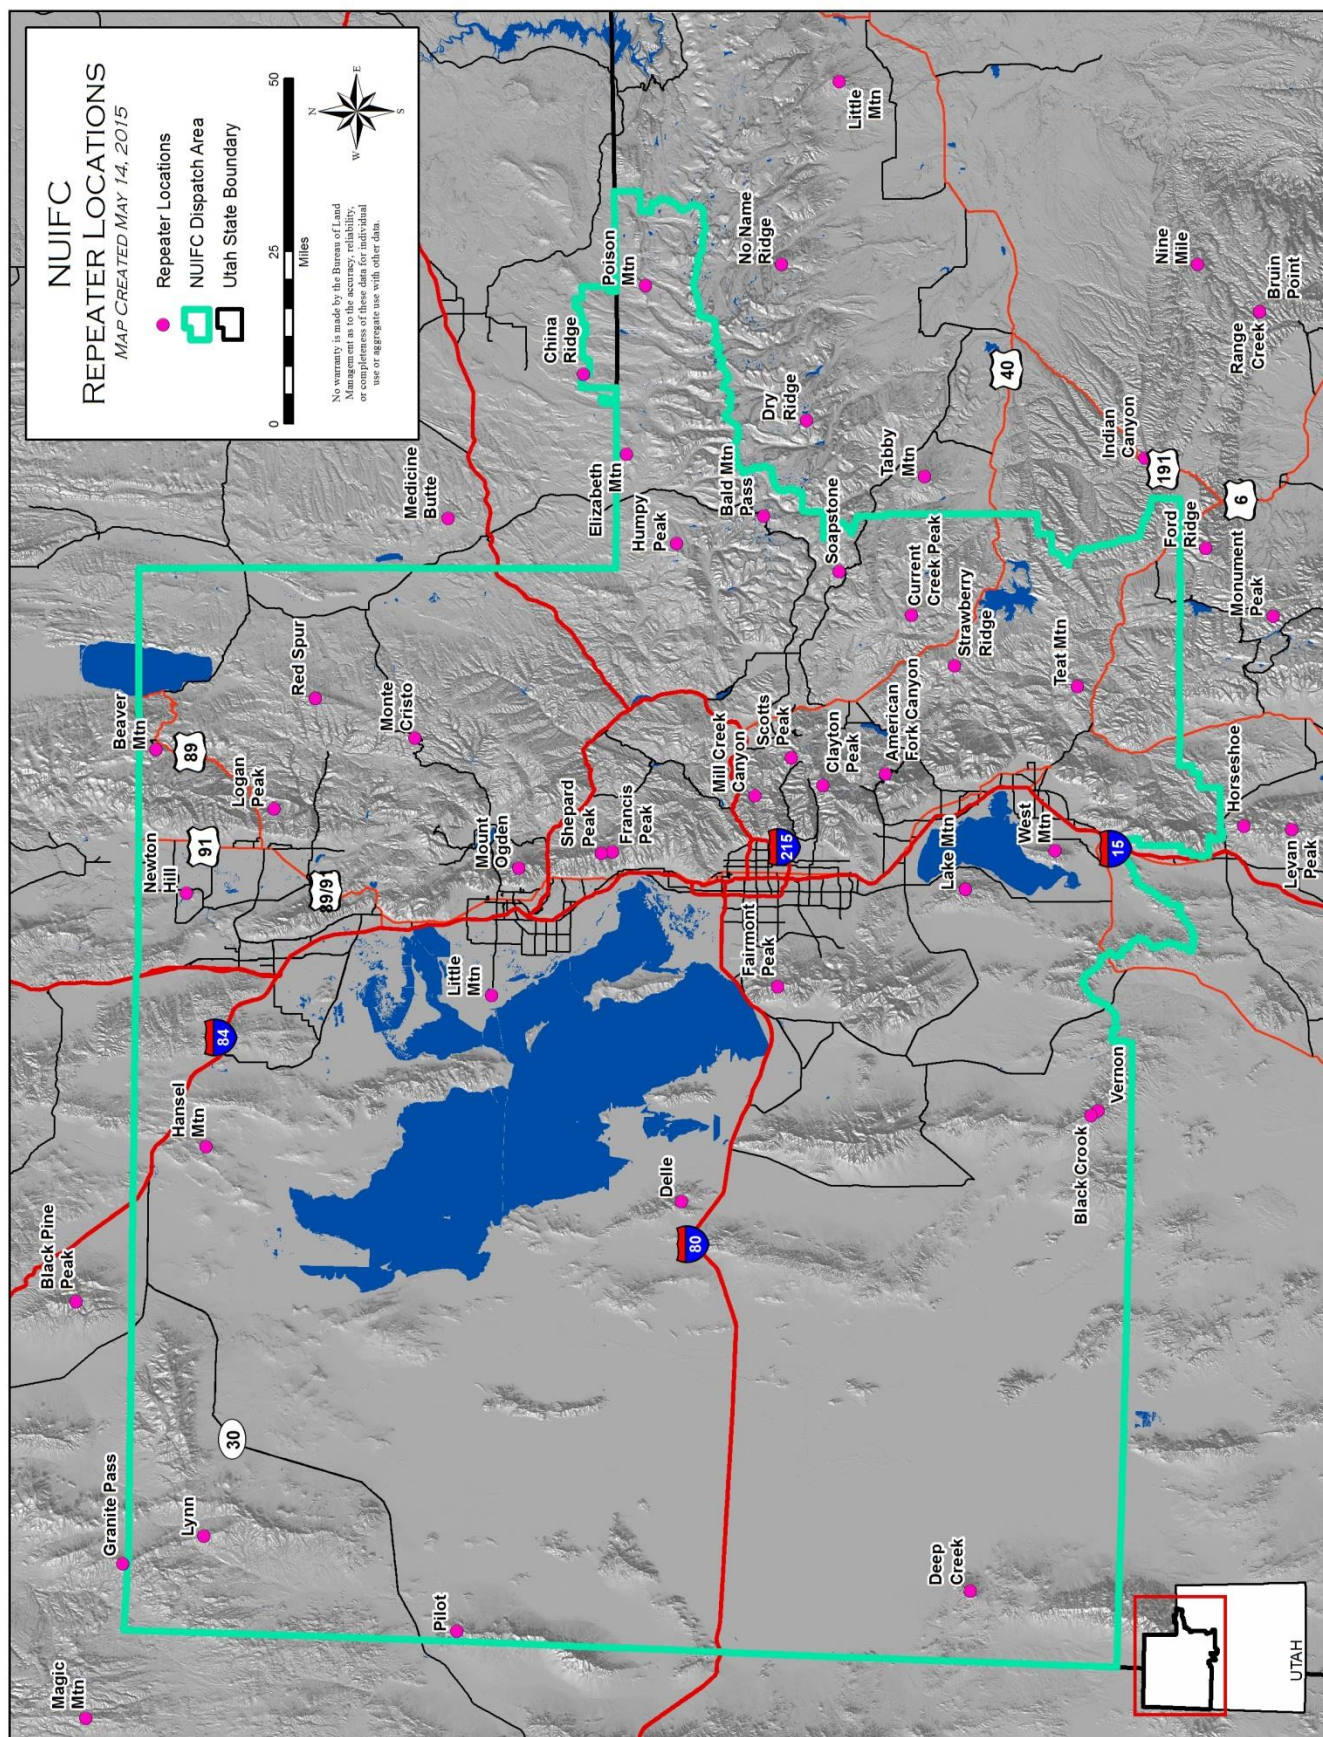

USFS: After resource duty hours, dispatchers will notify the appropriate USFS Zone Duty Officer who will determine the level of response for USFS fires. If unable to make contact with the Duty Officer, contact the District AFMO or Zone FMO. Dispatchers are still responsible for making all notifications per the Run Card.

Notes:

- Volunteer and city fire departments (or any other resource not dispatched by NUIFC) will not be considered as meeting the run card requirements for numbers of resources during the initial attack dispatch.
- The Northern Utah Interagency Multi-Agency Coordinating (MAC) group will convene and prioritize extended attack fires or as warranted.
- Any resource listed in parenthesis should be dispatched only if they are available locally.

- When the local Preparedness Level is 3 or higher, Summit and Wasatch County Fire Wardens can be used as closest resources only if approved by the State Northeast Area Duty Officer for out of county responses.
- If any resources are dispatched away from their zone, then the duty officer responsible for that resource needs to be notified.
- ICT3 which show up as a resource on Dispatch Level High, should be the IC that is currently on rotation with the Northern Utah Interagency Type 3 Incident Management Team. Only the IC will respond to the fire and if the Team is ordered by the Agency Administrator, then the rest of the Team will be mobilized. If the Team is already mobilized on another incident, then another ICT3 will need to be ordered.

- **Default Initial Response Color Coding for USFS:**
 - **Red** = Suppression
 - **Green** = Gather Intel, relay to dispatch, get further direction from FS
